

RAGHAV DHYANI

New Delhi, India

Phone No: +91 9667334186 | Email Id: raghavdhyani15@gmail.com | GitHub: <https://github.com/raghav-di> | Portfolio website: <https://raghavdhyani.infinityfreeapp.com> | LinkedIn: <https://www.linkedin.com/in/raghav-dhyani-3449b927a/>

CAREER SUMMARY:

Data focused Computer Science student with hands-on experience in machine learning, sentiment analysis, and large-scale data processing using Python, Scikit-learn, Pandas, and SQL. Built multithreaded data pipelines processing 100k+ records and developed predictive models using Random Forest and regression techniques. Experienced in EDA, feature engineering, NLP, and data visualization with Tableau, Matplotlib, and Seaborn. Passionate about data-driven problem solving, predictive analytics, and scalable ML systems.

SKILLS:

- Concepts: Probability and Statistics, DBMS, Operating System.
- Programming & Querying: Python, SQL
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau, MS Excel
- Data Cleaning & EDA: Exploratory Data Analysis (EDA), Data Wrangling, Statistical Analysis
- NLP & Text Analytics: NLTK, Sentiment Analysis
- Databases: PostgreSQL, MySQL

EXPERIENCE:

MicroIT | Remote | 2025

- Conducted Exploratory Data Analysis (EDA) on 100,000+ social media posts (2016–2025) to analyze impulse buying sentiment trends
- Built NLP pipeline using NLTK for sentiment classification and trend detection
- Cleaned and processed large-scale datasets using Pandas and NumPy
- Generated visual insights using Matplotlib and Seaborn to support marketing strategy decisions
- Collaborated with cross-functional teams to validate data integrity and reporting accuracy

Web Development Team Lead

National Cadet Corps (MAIT) | Delhi | 2024

- Led a team of developers to build and deploy the official NCC college website using React.js
- Improved Core Web Vitals: Best Practices (100), SEO (100), Performance (88), Accessibility (82)
- Deployed production-ready application on Vercel
- Coordinated UI/UX improvements and optimized frontend performance
- Deployment Link - (<https://ncc-mait-website-raghav-dhyanis-projects.vercel.app/>)

RELEVANT PROJECTS:

Python development:

Stock Analysis Webapp(<https://intostocks.streamlit.app>):

- AI stock analysis web tool, with stock price graph and regression based prediction with the help of sentiment analysis score of Reddit posts, collects over 20,000 posts within 2 to 4 minutes using multithreading techniques through multiple-threading.
- Technologies involved: Streamlit, Yfinance, Praw, Pandas, Plotly, Scikit-learn (Random forest regression), Nltk (Vader-lexicon).

SurveillancePy(https://drive.google.com/file/d/1ubpkKxA7nXAtutHgsa_f_y4HZANYsTS/view?usp=sharing):

- Automatic human detection using camera and reporting through email, in case of detection stores the image log after every 2 second to effectively use storage and sends email alert after every 12 seconds. UI created with Kivy Python library.
- Accuracy of around 88% in detecting human figure.
- Technologies involved: OpenCV, Smtplib server, Kivy.

AI video generation pipeline(https://github.com/raghav-di/ai_video_maker):

- Developed a scalable pipeline converting text stories into videos using Stable Diffusion XL (images), XTTS v2 (voice), and FFmpeg (rendering)
- Engineered prompt systems for character consistency and scene realism in generative models
- Built audio pipeline with narration + ambient sound mixing and timing synchronization
- Reduced TTS artifacts via text preprocessing, chunking, and prosody control
- Structured data flow using JSON scene graphs enabling modular video generation
- Implemented automated transitions and multi-scene rendering

Reachify(<https://github.com/raghav-di/reachify.git>):

- Reachify is a scalable campaign management and messaging platform that allows users to create, schedule, and execute Email and WhatsApp marketing campaigns from a unified dashboard. It is designed to handle large-scale concurrent campaigns efficiently using asynchronous background processing.
- FrontHand: Vanilla HTML, CSS, JavaScript, Tailwind CSS (UI styling), Firebase Authentication (Client-side)
- Backend: FastAPI (Python), PostgreSQL (Relational Database), Firebase Admin SDK (Auth verification)

EDUCATION:

Bachelor of Technology in Computer Science and Technology with specialisation in AIML

Maharaja Agrasen Institute of Technology (GGSIPU) | 2023-2027

Graduation year: 2027

GPA: 8.71

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming, Probability and Statistics.

CERTIFICATION:

Cisco Cybersecurity Essentials, TATA GenAI Job Simulation, Deloitte Analytics Simulation, SECURITI.ai Job Simulation, AWS SimuLearn Cloud essentials, AWS Educate Introduction to Generative AI - Training Badge, AWS Educate Machine Learning Foundations - Training Badge, Junior Cybersecurity Analyst Career Path, Anthropic certifications([Certificates link](#)) ([Credly link](#)).
